BACHEM

Revision: 23.02.2011 Printing date: 07.07.2016

### PRODUCT : µ-Conotoxin GIIIA

(Contd. of page 1)

- Other hazards
- Results of PBT and vPvB assessment
- PBT:
- Not applicable
- vPvB:
- Not applicable.

## 03 Composition/information on ingredients

- · Chemical characterization: Substances
- CAS No. Description
- 129129-65-3 µ-Conotoxin GIIIA
- Identification number(s)
- · EINECS Number:
- RTECS Number:

# 04 First aid measures

· General information: Involve doctor immediately. Immediately remove any clothing soiled by the product. Remove breathing equipment only after contaminated clothing have been completely removed. In case of irregular breathing or respiratory arrest provide artificial respiration. After inhalation: Supply fresh air or oxygen; call for doctor. In case of unconsciousness place patient stably in side position for transportation. Call a doctor immediately. After skin contact: Immediately wash with water and soap and rinse thoroughly. Seek immediate medical advice. After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing: Do not induce vomiting; call for medical help immediately. · Information for doctor: Most important symptoms and effects, both acute and delayed ٠ No further relevant information available. Indication of any immediate medical attention and special treatment needed No further relevant information available.

## 05 Firefighting measures

- Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- Special hazards arising from the substance or mixture
- No further relevant information available. • Advice for firefighters
- Protective equipment:
- Mouth respiratory protective device.

## 06 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Avoid formation of dust.
  - Use respiratory protective device against the effects of fumes/dust/ aerosol. Wear protective clothing.
- Environmental precautions: Suppress gases/fumes/haze with water spray.

(Contd. on page 3)

(Contd. of page 2)

### PRODUCT : µ-Conotoxin GIIIA

 Methods and material for containment and cleaning up: Dispose contaminated material as waste according to item 13.

# 07 Handling and storage

- · Handling:
- Precautions for safe handling Thorough dedusting.
   Ensure good ventilation/exhaustion at the workplace.
   Open and handle receptacle with care.
   Prevent formation of dust.
- Information about fire and explosion protection: Keep respiratory protective device available.
- Storage:
- Requirements to be met by storerooms and receptacles: No special requirements.
- Information about storage in one common storage facility: Store away from foodstuffs.
- Further information about storage conditions: Keep container tightly sealed. Store in dry conditions.
- Recommended storage temperature: -20 +/- 5 °C
- Specific end use(s) No further relevant information available.

## 08 Exposure controls/personal protection

 Ingredients with limit values that require monitoring at the workplace: Not required.

Additional information:

The lists valid during the making were used as basis.

- · Personal protective equipment:
- General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Store protective clothing separately. Avoid contact with the eyes and skin.
- Respiratory protection: In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.
- Protection of hands: The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Protective gloves
- Material of gloves
  - The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.
- Penetration time of glove material
- The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. • Eye protection:
- Safety glasses
