	Control parameters
	Ingredients with limit values that require monitoring at the workplace:
•	Additional information:
	The lists valid during the making were used as basis.
•	Exposure controls
	Personal protective equipment:
	General protective and hygienic measures:
	The usual precautionary measures are to be adhered to when handling chemicals.
	Respiratory protection: In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.
	Use suitable respiratory protective device in case of insufficient ventilation.
	Protection of hands:
	The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Protective gloves
	Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.
•	Penetration time of glove material
	The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
	Eye protection: Safety glasses
