SAFETY DATA SHEET

1. Identification

Product identifier Anhydrotetracycline Hydrochloride

Other means of identification

Catalog number 1035708 **CAS** number 13803-65-1

Chemical name (4S,4aS,12aS)-4-(Dimethylamino)-3,10,11,12a-tetrahydroxy-6-methyl-

1,12-dioxo-1,4,4a,5,12,12a-hexahydrotetracene-2-carboxamide monohydrochloride

Recommended use For analytical laboratory use only.

Not for use as a drug. Not for administration to humans or animals. Recommended restrictions

Manufacturer/Importer/Supplier/Distributor information

Manufacturer

Company name U. S. Pharmacopeia **Address** 12601 Twinbrook Parkway

> Rockville MD

20852-1790 **United States**

Telephone **Technical Services** 301-816-8129

Website www.usp.org E-mail RSTECH@usp.org

CHEMTREC within US & **Emergency phone number** 1-800-424-9300

Canada

CHEMTREC outside US & +1 703-527-3887

Canada

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Reproductive toxicity

Environmental hazards Not classified. **OSHA** defined hazards Not classified.

Label elements

Warning Signal word

Hazard statement Suspected of damaging fertility or the unborn child.

Precautionary statement

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

and understood. Wear protective gloves/protective clothing/eye protection/face protection.

Category 2

If exposed or concerned: Get medical advice/attention. Response

Store locked up. Storage

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise

classified (HNOC)

None known.

Supplemental information Pharmaceutical related compound of unknown potency.

3. Composition/information on ingredients

Substance

Material name: Anhydrotetracycline Hydrochloride USP SDS US

Chemical name	Common name and synonyms	CAS number	%	
Anhydrotetracycline Hydrochloride		13803-65-1	>95	
Impurities				
Chemical name	Common name and synonyms	CAS#	Percent	
Tetracycline Hydrochloride		64-75-5	<5%	
Composition comments	Occupational Exposure Limits for impurities are listed in Section 8.			
4. First-aid measures				
Inhalation	If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Call a physician if symptoms develop or persist.			
Skin contact	Rinse skin with water/shower. Get medical attention if irritation develops and persists.			
Eye contact	Rinse with water. Get medical attention if irritation develops and persists.			
Ingestion	Rinse mouth. If ingestion of a large amount does occur, call a poison control center immediately.			
Most important symptoms/effects, acute and delayed	Pharmaceutical related compound of unknown potency. It is not known if occupational exposure may cause physiological effects.			
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.			
General information	an occupational health physician or other lice chemical exposures. In the United States, the 1-800-222-1222. If person is not breathing, gi	from exposure. Remove contaminated clothing. For treatment advice, seek guidance from rational health physician or other licensed health-care provider familiar with workplace exposures. In the United States, the national poison control center phone number is 2-1222. If person is not breathing, give artificial respiration. If breathing is difficult, give available. Persons developing serious hypersensitivity (anaphylactic) reactions must mediate medical attention.		
5. Fire-fighting measures				
Suitable extinguishing media	Water. Foam. Dry chemical or CO2. Use firematerials.	fire-extinguishing media appropriate for surrounding		
Unsuitable extinguishing media	None known.			
Specific hazards arising from the chemical	No unusual fire or explosion hazards noted.			
Special protective equipment and precautions for firefighters	Wear suitable protective equipment.			
Fire fighting equipment/instructions	Use water spray to cool unopened containers Firefighters should use self-contained breathi			
Specific methods	Cool containers exposed to flames with water until well after the fire is out			

Specific methods

Cool containers exposed to flames with water until well after the fire is out.

General fire hazards No unusual fire or explosion hazards noted.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Wear appropriate personal protective equipment. Avoid inhalation of dust from the spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Avoid the generation of dusts during clean-up. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

As a general rule, when handling USP materials, avoid all contact and inhalation of dust, mists, and/or vapors associated with the material. Clean equipment and work surfaces with suitable detergent or solvent after use. After removing gloves, wash hands and other exposed skin thoroughly. Select and use containment devices and personal protective equipment based on a risk assessment of material potency and exposure potential.

Conditions for safe storage, including any incompatibilities Store in tight container. This material should be handled and stored per label instructions to ensure product integrity.

Material name: Anhydrotetracycline Hydrochloride USP SDS US 2/7 1035708 Version #: 03 Revision date: 02-19-2021 Issue date: 01-30-2019

8. Exposure controls/personal protection

Occupational exposure limits No exposure limits noted for ingredient(s).

No biological exposure limits noted for the ingredient(s). **Biological limit values**

Appropriate engineering

controls

No open handling. For laboratory operations, use approved ventilation or containment system (biological safety cabinet, ventilated balance enclosure, glovebox). Control exposures to below the occupational exposure level (if available). Select and use containment devices and personal protective equipment based on a risk assessment of exposure potential. Cover all containers for solutions and slurries while being transferred.

Individual protection measures, such as personal protective equipment

Eye/face protection Wear safety glasses with side shields, chemical splash goggles, or full face shield, if necessary.

Base the choice of protection on the job activity and potential for contact with eyes or face. An

emergency eye wash station should be available.

Skin protection

Hand protection Consider double gloves. Wear nitrile or other impervious gloves if skin contact is possible. When

the material is dissolved or suspended in an organic solvent, wear gloves that provide protection

against the solvent.

Train employees in proper gowning and degowning practices. Wear disposable lab coat, Other

disposable sleeve covers and two pair of gloves as appropriate for the task. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use. Do

not wear protective garments in common areas (e.g., cafeterias) or out-of-doors.

Use a powered air-purifying respirator (PAPR) with HEPA filters, disposable outerware and head Respiratory protection

cover for spill cleanup. Choose respiratory protection appropriate to the task and the level of

existing engineering controls.

Thermal hazards Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Pharmacological effects may be seen with occupational exposure. Handling practices in this SDS

are recommendations for laboratory use of USP materials.

9. Physical and chemical properties

Appearance descriptions are general information and not specific to any USP lot. **Appearance**

Solid. **Physical state** Solid. **Form** Color Yellow.

Odor Not available. **Odor threshold** Not available. pН Not available.

Melting point/freezing point 397.4 - 401 °F (203 - 205 °C)

Initial boiling point and boiling

range

Not available.

Flash point Not available. Not available. **Evaporation rate** Flammability (solid, gas) Not available. Upper/lower flammability or explosive limits

Flammability limit - lower

Not available.

Flammability limit - upper

(%)

Not available.

(%) Explosive limit - lower (%) Not available.

Not available. Explosive limit - upper (%) Vapor pressure Not available. Vapor density Not available. Relative density Not available.

Solubility(ies)

Solubility (water) Not available.

Dimethylsulfoxide: Slightly soluble. Solubility (other)

Methanol: Slightly soluble.

Other information

Molecular formula C22H22N2O7 . HCI

Molecular weight 462.89

10. Stability and reactivity

ReactivityThe product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous

reactions

No dangerous reaction known under conditions of normal use.

Conditions to avoid Avoid temperatures exceeding the decomposition temperature. Contact with incompatible

materials.

Incompatible materials None known.

Hazardous decomposition

products

NOx. Cl-. Irritating and/or toxic fumes or gases. Emits toxic fumes under fire conditions.

11. Toxicological information

Information on likely routes of exposure

InhalationKnowledge about health hazard is incomplete.Skin contactKnowledge about health hazard is incomplete.Eye contactKnowledge about health hazard is incomplete.IngestionKnowledge about health hazard is incomplete.

Symptoms related to the physical, chemical and toxicological characteristics

Tetracyclines: Gastrointestinal disturbances. Irritant effects. Dizziness. Unsteadiness. Bone or

tooth discoloration.

Information on toxicological effects

Acute toxicity

Toxicological data

Impurities Species Test Results

Tetracycline Hydrochloride (CAS 64-75-5)

Not listed.

US. National Toxicology Program (NTP) Report on Carcinogens

Not listed.

1035708 Version #: 03 Revision date: 02-19-2021 Issue date: 01-30-2019

Suspected of damaging fertility or the unborn child. Tetracyclines: Use of tetracyclines during the Reproductive toxicity

last half of pregnancy may cause permanent discoloration of the teeth, incomplete development or lack of enamel, and inhibition of skeletal growth in the fetus. Tetracyclines administered early in pregnancy have been found to cause harm to the embryo, including congenital cataracts. In addition, fatty infiltration of the liver, leading to damage or failure, may occur in pregnant women.

Specific target organ toxicity -

single exposure

Knowledge about health hazard is incomplete.

Specific target organ toxicity -

repeated exposure

Knowledge about health hazard is incomplete.

Aspiration hazard

Based on available data, the classification criteria are not met.

Further information

Pharmaceutical related compound of unknown potency It is not known if occupational exposure

may cause physiological effects.

12. Ecological information

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Impurities Species Test Results

Tetracycline Hydrochloride (CAS 64-75-5)

Aquatic

Fish LC50 Lake trout, siscowet (Salvelinus 186.9 - 258.9 mg/l, 96 hours

namaycush)

Persistence and degradability No data is available on the degradability of this product.

Bioaccumulative potential No data available. No data available. Mobility in soil

No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation Other adverse effects

potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Dispose in accordance with all applicable regulations. Under RCRA, it is the responsibility of the **Disposal instructions**

user of the product to determine, at the time of disposal, whether the product meets RCRA criteria

for hazardous waste.

Local disposal regulations

Dispose in accordance with all applicable regulations.

The waste code should be assigned in discussion between the user, the producer and the waste Hazardous waste code

disposal company.

Waste from residues / unused

products

Empty containers or liners may retain some product residues. This material and its container must

be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging Empty containers should be taken to an approved waste handling site for recycling or disposal.

Since emptied containers may retain product residue, follow label warnings even after container is

emptied.

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

Transport in bulk according to

Not applicable.

Annex II of MARPOL 73/78 and

the IBC Code

General information It is the shipper's responsibility to determine the correct transport classification at the time of

shipment.
