SAFETY DATA SHEET

1. Identification

| Product identifier | Benoxinate Hydrochloride | 1 | |
|----------------------------------|---|-----------------------------------|---|
| Other means of identification | | | |
| Catalog number | 1050009 | | |
| CAS number | 5987-82-6 | | |
| Synonyms | Oxybuprocaine hydrochlorid | e | |
| Chemical name | 2-(Diethylamino)ethyl 4-amir | no-3-butoxybenzo | ate monohydrochloride |
| Recommended use | For analytical laboratory use | e only. | |
| Recommended restrictions | Not for use as a drug. Not for | or administration to | humans or animals. |
| Manufacturer/Importer/Supplier/I | Distributor information | | |
| Manufacturer | | | |
| Company name Address | U. S. Pharmacopeia 12601 Twinbrook Parkway Rockville MD 20852-1790 United States | | |
| Telephone | Customer Service | 301-881-0666 | |
| Website | www.usp.org | | |
| E-mail | RSTECH@usp.org | | |
| Emergency phone number | CHEMTREC within US & Canada CHEMTREC outside US & | 1-800-424-9300 +1 703-527-3887 | 7 |
| | Canada | | |
| 2. Hazard(s) identification | | | |
| Physical hazards | Not classified. | | |
| Health hazards | Acute toxicity, oral | | Category 4 |
| | Acute toxicity, dermal | | Category 4 |
| | Acute toxicity, inhalation | | Category 4 |
| | Skin corrosion/irritation | | Category 2 |
| | Serious eye damage/eye irri | tation | Category 2A |
| | Specific target organ toxicity | , single exposure | Category 3 respiratory tract irritation |
| Environmental hazards | Not classified. | | |
| OSHA defined hazards | Not classified. | | |
| Label elements | | | |
| | \wedge | | |

Signal word Hazard statement

Harmful if swallowed. Harmful in contact with skin. Causes skin irritation. Causes serious eye irritation. Harmful if inhaled. May cause respiratory irritation.

Precautionary statement Prevention

Avoid breathing dust. Wash thoroughly after handling. Wear eye protection/face protection. Wear protective gloves/protective clothing. Use only outdoors or in a well-ventilated area.

Warning

| Response | If swallowed: Call a poison center/doctor if you feel unwell. Rinse mouth. If on skin: Wash with plenty of water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center/doctor if you feel unwell. |
|--|--|
| Storage | Store in a well-ventilated place. Keep container tightly closed. Store locked up. |
| Disposal | Dispose of contents/container in accordance with local/regional/national/international regulations. |
| Hazard(s) not otherwise classified (HNOC) | This product is supplied in a small quantity which does not constitute a combustible dust hazard. The physical properties of this material indicate that in large quantities accumulated dust may be hazardous. |
| Supplemental information | Pharmacologically active material. |

3. Composition/information on ingredients

Substance

| Chemical name | Common name and synonyms | CAS number | % |
|--------------------------|-----------------------------|------------|-----|
| Benoxinate Hydrochloride | Oxybuprocaine hydrochloride | 5987-82-6 | 100 |

Information provided in the SDS is not specific to the lot provided. Refer to the label and USP Certificate/Product Information Sheet for the assigned value of a particular lot.

| 4. First-aid measures | |
|--|--|
| | |
| Inhalation | If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Call a physician if symptoms develop or persist. |
| Skin contact | Take off immediately all contaminated clothing. Rinse skin with water/shower. Get medical advice/attention if you feel unwell. If skin irritation occurs: Get medical advice/attention. Wash contaminated clothing before reuse. |
| Eye contact | Rinse with water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists. |
| Ingestion | Rinse mouth thoroughly. If ingestion of a large amount does occur, call a poison control center immediately. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. |
| Most important symptoms/effects, acute and delayed | Pharmacologically active material. Occupational exposure may cause physiological effects. |
| Indication of immediate medical attention and special treatment needed | Provide general supportive measures and treat symptomatically. |
| General information | Remove from exposure. Remove contaminated clothing. For treatment advice, seek guidance from an occupational health physician or other licensed health-care provider familiar with workplace chemical exposures. In the United States, the national poison control center phone number is 1-800-222-1222. If person is not breathing, give artificial respiration. If breathing is difficult, give oxygen if available. Persons developing serious hypersensitivity (anaphylactic) reactions must receive immediate medical attention. |
| 5. Fire-fighting measures | |
| Suitable extinguishing media | Water. Foam. Dry chemical or CO2. Use fire-extinguishing media appropriate for surrounding materials. |
| Unsuitable extinguishing media | None known. |
| Specific hazards arising from the chemical | Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard. |
| Special protective equipment and precautions for firefighters | Wear suitable protective equipment. |
| Fire fighting equipment/instructions | Use water spray to cool unopened containers. As with all fires, evacuate personnel to a safe area. Firefighters should use self-contained breathing equipment and protective clothing. |
| Specific methods | Use standard firefighting procedures and consider the hazards of other involved materials. |
| General fire hazards | No unusual fire or explosion hazards noted. |

6. Accidental release measures

| 0. Accidental release measures | | |
|---|--|--|
| Personal precautions, protective equipment and emergency procedures | Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Keep unnecessary personnel away. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid inhalation of dust from the spilled material. Ensure adequate ventilation. For personal protection, see section 8 of the SDS. Wear appropriate protective equipment and clothing during clean-up. | |
| Methods and materials for containment and cleaning up | Avoid the generation of dusts during clean-up. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS. | |
| Environmental precautions | Avoid discharge into drains, water courses or onto the ground. | |
| 7. Handling and storage | | |
| Precautions for safe handling | As a general rule, when handling USP materials, avoid all contact and inhalation of dust, mists, and/or vapors associated with the material. Clean equipment and work surfaces with suitable detergent or solvent after use. After removing gloves, wash hands and other exposed skin thoroughly. Avoid significant deposits of material, especially on horizontal surfaces, which may become airborne and form combustible dust clouds and may contribute to secondary explosions. Combustible dust clouds may be created where operations produce fine material (dust). Select and use containment devices and personal protective equipment based on a risk assessment of material potency and exposure potential. | |
| Conditions for safe storage, including any incompatibilities | Store in tight container. This material should be handled and stored per label instructions to ensure product integrity. | |
| | | |

8. Exposure controls/personal protection

| Occupational exposure limits | No exposure limits noted for ingredient(s). |
|-------------------------------------|---|
| Biological limit values | No biological exposure limits noted for the ingredient(s). |
| Appropriate engineering controls | For laboratory operations, use local exhaust ventilation or a ventilated enclosure for high energy operations such as particle sizing. Control exposures to below the occupational exposure level (if available). Select and use containment devices and personal protective equipment based on a risk assessment of exposure potential. Cover all containers for solutions and slurries while being transferred. |
| Individual protection measures, | such as personal protective equipment |
| Eye/face protection | Wear safety glasses with side shields, chemical splash goggles, or full face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available. |
| Skin protection | |
| Hand protection | Wear nitrile or other impervious gloves if skin contact is possible. When the material is dissolved or suspended in an organic solvent, wear gloves that provide protection against the solvent. |
| Other | Train employees in proper gowning and degowning practices. Wear lab coat. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use. Do not wear protective garments in common areas (e.g., cafeterias) or out-of-doors. |
| Respiratory protection | Respirators are generally not required for laboratory operations. Use a tight-fitting full-face respirator with HEPA filters for spill cleanup. Choose respiratory protection appropriate to the task and the level of existing engineering controls. |
| Thermal hazards | Wear appropriate thermal protective clothing, when necessary. |
| General hygiene considerations | Handling practices in this SDS are recommendations for laboratory use of USP materials. |

9. Physical and chemical properties

| Appearance | Appearance descriptions are general information and not specific to any USP lot. | | |
|---|--|--|--|
| Physical state | Solid. | | |
| Form | Powder. | | |
| Color | Off-white. White. | | |
| Odor | Odorless. Characteristic odor. | | |
| Odor threshold | Not available. | | |
| рН | Not available. | | |
| Melting point/freezing point | 316.4 - 323.6 °F (158 - 162 °C) | | |
| Initial boiling point and boiling range | Not available. | | |

| Reactivity | The product is stable and non-reactive under normal conditions of use, storage and transport. | |
|---------------------------------------|---|--|
| Chemical stability | Material is stable under normal conditions. | |
| Possibility of hazardous reactions | No dangerous reaction known under conditions of normal use. | |
| Conditions to avoid | Contact with incompatible materials. | |
| Incompatible materials | Acids. Alkalis. Oxidizing agents. Reducing agents. | |
| Hazardous decomposition products | Irritating and/or toxic fumes or gases. Emits toxic fumes under fire conditions. NOx. Cl | |

11. Toxicological information

Information on likely routes of exposure

| Inhalation | Harmful if inhaled. | |
|--|---|--|
| Skin contact | Harmful in contact with skin. Causes skin irritation. | |
| Eye contact | Causes serious eye irritation. | |
| Ingestion | Harmful if swallowed. | |
| Symptoms related to the physical, chemical and toxicological characteristics | Dizziness. Irregular heartbeat. Shivering. Blue or pale lips, fingernails, and skin. Unusual bleeding. Bruising. Constipation. Fever. Back pain. Fatigue. Headache. Weakness. Nausea. Numbness. Itching. Difficulty breathing. Convulsions. Cessation of breathing, slowed heart rate and seizures. | |
| lafammation on tanks lands of a the | | |

Information on toxicological effects

| Acute toxicity | Harmful if inhaled. Harmful in contact with skin. Harmful if swallowed. |
|--------------------------------------|---|
| Skin corrosion/irritation | Causes skin irritation. |
| Serious eye damage/eye irritation | Causes serious eye irritation. |

| F | Respiratory or skin sensitization | | |
|---|--|---|--|
| | Respiratory sensitization | Knowledge about health hazard is incomplete. | |
| | Skin sensitization | Knowledge about health hazard is incomplete. | |
| C | Germ cell mutagenicity | Knowledge about mutagenicity is incomplete. | |
| C | Carcinogenicity | Knowledge about carcinogenicity is incomplete. | |
| | IARC Monographs. Overall E | Evaluation of Carcinogenicity | |
| | Not listed. | | |
| | OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053) | | |
| | Not listed. | | |
| | US. National Toxicology Program (NTP) Report on Carcinogens | | |
| | Not listed. | | |
| F | Reproductive toxicity | Knowledge about health hazard is incomplete. | |
| | Specific target organ toxicity - single exposure | May cause respiratory irritation. | |
| | Specific target organ toxicity - repeated exposure | Knowledge about health hazard is incomplete. | |
| ŀ | Aspiration hazard | Based on available data, the classification criteria are not met. | |
| F | Further information | Pharmacologically active material. Occupational exposure may cause physiological effects. | |
| | | | |

12. Ecological information

Ecotoxicity

| | Species | Test Results |
|-------------------|---------------|--------------------|
| ide (CAS 5987-82- | 6) | |
| | | |
| | | |
| EC50 | Daphnia magna | 30.2 mg/l, 4 hours |
| | | de (CAS 5987-82-6) |

Persistence and degradability No data is available on the degradability of this substance.

Bioaccumulative potential

| Octanol/water partition coet 4.38 | ficient log Kow |
|--------------------------------------|---|
| Mobility in soil | No data available. |
| Other adverse effects | No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component. |

13. Disposal considerations

| Disposal instructions | Dispose in accordance with all applicable regulations. Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste. |
|--|--|
| Local disposal regulations | Dispose in accordance with all applicable regulations. |
| Hazardous waste code | The waste code should be assigned in discussion between the user, the producer and the waste disposal company. |
| Waste from residues / unused products | Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). |
| Contaminated packaging | Since emptied containers may retain product residue, follow label warnings even after container is emptied. |

14. Transport information

DOT

Not regulated as dangerous goods.

ΙΑΤΑ

Not regulated as dangerous goods.

| Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code | Not applicable. |
|--|---------------------|
| General information | It is the shipper's |

It is the shipper's responsibility to determine the correct transport classification at the time of shipment.

15. Regulatory information

| 15. Regulatory Information | n | |
