

# SAFETY DATA SHEET

## 1. Identification

1. Identification			
Product identifier	Tacrolimus		
Other means of identification			
Catalog number	1642802		
CAS number	109581-93-3		
Chemical name	(-)-(3S,4R,5S,8R,9E,12S,14S,15R,16S,18R,19R,26aS)-8-allyl-5,6,8,11,12,13,14,15,16,17,18,19,2 4,25,26,26a-hexadecahydro-5,19-dihydroxy-3-[(E)-2-[(1R,3R,4R)-4-hydroxy-3-methoxycyclohexyl]- 1-methylvinyl]-14,16-dimethoxy-4,10,12,18-tetramethyl-15,19-epoxy-3H-pyrido[2,1-c] [1,4]oxaazacyclotricosine-1,7,20,21-(4H,23H)-tetrone, monohydrate		
Recommended use	For analytical laboratory use	only.	
<b>Recommended restrictions</b>	Not for use as a drug. Not fo	r administration to	o humans or animals.
Manufacturer/Importer/Supplier/	Distributor information		
Manufacturer			
Company name Address	U. S. Pharmacopeia 12601 Twinbrook Parkway Rockville MD 20852-1790 United States		
Telephone	Technical Services	301-816-8129	
Website E-mail	www.usp.org RSTECH@usp.org		
Emergency phone number	CHEMTREC within US & Canada CHEMTREC outside US & Canada	1-800-424-9300 +1 703-527-3887	7
2. Hazard(s) identification			
Physical hazards	Not classified.		
Health hazards	Acute toxicity, oral		Category 3
	Serious eye damage/eye irri	tation	Category 2B
	Carcinogenicity		Category 2
	Reproductive toxicity		Category 2
	Specific target organ toxicity exposure	, repeated	Category 1 (Immune system)
Environmental hazards	Not classified.		
OSHA defined hazards	Not classified.		
Label elements			

Signal word Hazard statement

Toxic if swallowed. Causes eye irritation. Suspected of causing cancer. Suspected of damaging fertility or the unborn child. Causes damage to organs (Immune system) through prolonged or repeated exposure.

#### Precautionary statement Prevention

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust/fume/gas/mist/vapors/spray. Wash thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.

Danger

Response	If swallowed: Immediately call a poison center/doctor. Rinse mouth. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If exposed or concerned: Get medical advice/attention.
Storage	Store locked up.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	None known.
Supplemental information	Potent pharmacologically active material.

#### 3. Composition/information on ingredients

Substance

Chemical name	Common name and synonyms	CAS number	%
Tacrolimus		109581-93-3	100

Information provided in the SDS is not specific to the lot provided. Refer to the label and USP Certificate/Product Information Sheet for the assigned value of a particular lot.

4. First-aid measures	
Inhalation	If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. Call a physician if symptoms develop or persist.
Skin contact	Rinse skin with water/shower. Get medical attention if irritation develops and persists.
Eye contact	Rinse with water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	Rinse mouth thoroughly. If ingestion of a large amount does occur, call a poison control center immediately. Do not use mouth-to-mouth method if substance is ingested. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Do not induce vomiting without advice from poison control center.
Most important symptoms/effects, acute and delayed	Immune system depression. Potent pharmacologically active material. Occupational exposure to small amounts may cause physiological effects.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically.
General information	Remove from exposure. Remove contaminated clothing. For treatment advice, seek guidance from an occupational health physician or other licensed health-care provider familiar with workplace chemical exposures. In the United States, the national poison control center phone number is 1-800-222-1222. If person is not breathing, give artificial respiration. If breathing is difficult, give oxygen if available. Persons developing serious hypersensitivity (anaphylactic) reactions must receive immediate medical attention.
5. Fire-fighting measures	
Suitable extinguishing media	Water. Foam. Dry chemical or CO2. Use fire-extinguishing media appropriate for surrounding materials.
Unsuitable extinguishing media	None known.
Specific hazards arising from the chemical	No unusual fire or explosion hazards noted.
Special protective equipment and precautions for firefighters	Wear suitable protective equipment.
Fire fighting equipment/instructions	As with all fires, evacuate personnel to a safe area. Firefighters should use self-contained breathing equipment and protective clothing.
Specific methods	Use standard firefighting procedures and consider the hazards of other involved materials.
General fire hazards	No unusual fire or explosion hazards noted.
6. Accidental release meas	sures

# Personal precautions,<br/>protective equipment and<br/>emergency proceduresKeep unnecessary personnel away. Wear appropriate personal protective equipment. Avoid<br/>inhalation of dust from the spilled material. Do not touch damaged containers or spilled material<br/>unless wearing appropriate protective clothing. Ensure adequate ventilation. For personal<br/>protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up	Avoid the generation of dusts during clean-up. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	As a general rule, when handling USP materials, avoid all contact and inhalation of dust, mists, and/or vapors associated with the material. Clean equipment and work surfaces with suitable detergent or solvent after use. After removing gloves, wash hands and other exposed skin thoroughly. Select and use containment devices and personal protective equipment based on a risk assessment of material potency and exposure potential.
Conditions for safe storage, including any incompatibilities	Store in tight container. This material should be handled and stored per label instructions to ensure product integrity.

### 8. Exposure controls/personal protection

#### **Occupational exposure limits**

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

Exposure limit values Industrial Use			
Material	Туре	Value	
Tacrolimus (CAS 109581-93-3)	TWA	0.2 micrograms/m3	
Biological limit values	No biological exposure limits noted for	or the ingredient(s).	
Appropriate engineering controls	(biological safety cabinet, ventilated l occupational exposure level (if availa protective equipment based on a risk	lo open handling. For laboratory operations, use approved ventilation or containment system biological safety cabinet, ventilated balance enclosure, glovebox). Control exposures to below the ccupational exposure level (if available). Select and use containment devices and personal rotective equipment based on a risk assessment of exposure potential. Cover all containers for olutions and slurries while being transferred.	
Individual protection measure	s, such as personal protective equipm	ent	
Eye/face protection		s, chemical splash goggles, or full face shield, if necessary. job activity and potential for contact with eyes or face. An be available.	
Skin protection			
Hand protection		or other impervious gloves if skin contact is possible. When ad in an organic solvent, wear gloves that provide protection	
Other	disposable sleeve covers and two pa skin protection on the job activity, po	and degowning practices. Wear disposable lab coat, ir of gloves as appropriate for the task. Base the choice of tential for skin contact and solvents and reagents in use. Do mon areas (e.g., cafeterias) or out-of-doors.	
Respiratory protection		or (PAPR) with HEPA filters, disposable outerware and head ratory protection appropriate to the task and the level of	
Thermal hazards	Wear appropriate thermal protective	clothing, when necessary.	
General hygiene considerations	Pharmacological effects may be seen with occupational exposure. Handling practices in this SDS are recommendations for laboratory use of USP materials.		
9. Physical and chemica	l properties		
Appearance	Appearance descriptions are general	information and not specific to any USP lot.	

Appearance	Appearance descriptions are general information and not specific to any USP lot.
Physical state	Solid.
Form	Powder.
Color	White.
Odor	Not available.
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	260.6 - 271.4 °F (127 - 133 °C)
Initial boiling point and boiling range	Not available.

Flash point	Not available.	
Evaporation rate	Not available.	
Flammability (solid, gas)	Not available.	
Upper/lower flammability or exp	osive limits	
Flammability limit - lower (%)	Not available.	
Flammability limit - upper (%)	Not available.	
Explosive limit - lower (%)	Not available.	
Explosive limit - upper (%)	Not available.	
Vapor pressure	Not available.	
Vapor density	Not available.	
Relative density	Not available.	
Solubility(ies)		
Solubility (water)	Insoluble.	
Solubility (other)	Ethanol: Freely soluble. Methanol: Very soluble. Acetone: Soluble. Ethyl acetate: Soluble. Chloroform: Soluble. Diethyl ether: Soluble. Hexane: Sparingly soluble.	
Auto-ignition temperature	Not available.	
Decomposition temperature	Not available.	
Viscosity	Not available.	
Other information		
Chemical family	Macrolide.	
Molecular formula	C44H69NO12 . H2O	
Molecular weight	822.03	

# 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Stable at normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Contact with incompatible materials.
Incompatible materials	Strong oxidizing agents.
Hazardous decomposition products	Irritating and/or toxic fumes or gases. Emits toxic fumes under fire conditions. NOx.

# 11. Toxicological information

### Information on likely routes of exposure

Inhalation	Knowledge about health hazard is incomplete.	
Skin contact	Knowledge about health hazard is incomplete.	
Eye contact	Causes eye irritation.	
Ingestion	Toxic if swallowed. Based on information from therapeutic use, this material may cause: Immunosuppresion.	
Symptoms related to the physical, chemical and toxicological characteristics	Hypertension. Kidney damage. Infection. Gastrointestinal disturbances. Headache. Tremor. Hyperglycemia. Seizures.	
Information on toxicological eff	fects	
Acute toxicity	Toxic if swallowed.

Specific targ	get organ toxicity - sure	Knowledge about health hazard is incomplete.
Specific targ	jet organ toxicity - posure	Causes damage to organs (Immune system) through prolonged or repeated exposure.
Aspiration h	azard	Based on available data, the classification criteria are not met.
Further info	rmation	Potent pharmacologically active material. Occupational exposure to small amounts may cause physiological effects.

# 12. Ecological information

Ecotoxicity	The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.
Persistence and degradability	No data is available on the degradability of this substance.
Bioaccumulative potential	No data available.
Mobility in soil	No data available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

# 13. Disposal considerations

Disposal instructions	Dispose in accordance with all applicable regulations. Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied.

# 14. Transport information

Disclaimer	USP materials are sold for analytical laboratory use only, and NOT for human consumption. The information contained herein is applicable solely to the chemical substance when used for analytical laboratory use and does not necessarily relate to any other use of the substance described, (i.e. at different concentrations, in drug dosage forms, or in bulk quantities). USP materials are intended for use by persons having technical skill and at their own discretion and risk. This information has been developed by USP staff from sources considered reliable but has not been independently verified by the USP. Therefore, the USP Convention cannot guarantee the accuracy of the information in these sources nor should the statements contained herein be considered an official expression. NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE is made with respect to the information contained herein.
